JAMES BALINGIT

Cybersecurity Analyst

Sydney, NSW • james@gmail.com

EDUCATION

Diploma of Information and Communications Technology
Western Sydney University College

WORK & PRACTICAL EXPERIENCE

Database Design & SQL Analyst (Academic Project)
Western Sydney University College

- Designed a relational database for an e-commerce platform using MySQL and XAMPP.
- Utilized primary keys, foreign keys, and check validation for data integrity.
- Designed SQL codes and functions to organize data and records.

Network Systems Administrator (Lab Project)
Western Sydney University College

- Configured IPv4/IPv6 network topologies with Cisco and physical routers using Cisco in-class labs.
- Configured IP addresses, routes, and default gateways.
- Checked and fixed connectivity issues using tables and diagnostics (`show ip route`, `show ip interface brief`).

Algorithm & Software Logic Designer (Academic Project)
Western Sydney University College

- Structured step-by-step algorithms with validation loops to process customer requests and calculate automated pricing discounts.
- Developed multiple test cases to validate and check input constraints, handling invalid inputs.

TECHNICAL SKILLS

Databases & Tools: MySQL, XAMPP, phpMyAdmin, Relational Data Modeling, Primary/Foreign Keys, Data Integrity
Networking & Systems: Cisco IOS, IPv4/IPv6 Topologies, Routing, Default Gateways, CLI Diagnostics
Software Logic: Algorithm Design, Input Validation Loops, Automated Pricing Logic, Test Case Execution
